Overview

With each software release, we work to improve the Contractor Performance Assessment Reporting System (CPARS) and Federal Awardee Performance and Integrity Information System (FAPIIS) user experience and improve the quality of information available from CPARS and FAPIIS. We do this through a combination of minor enhancements and fixing known issues. This document summarizes the customer-facing changes that were made to the CPARS Website and the CPARS/FAPIIS application in version 6.3.4 on December 20, 2020.

Release Notes

Description	Reference IDs
Enhancements	
Added checklist criteria in the change password pages that indicate whether or not password requirements have been met.	200001
Allow users to edit their pending requests or remove them when submitting for a user role under the CPARS Access Info.	200007
Added automatic report scheduler for APOC/DPOC to access contract status and metrics data without having to log into CPARS.	200046
Spreadsheet Link for Metrics of CSR 200046 Report Scheduler.	200048
Fixed error after approving users roles when clicking on pending access requests instead of home which created a duplicate request error.	200144
Corrected bug fixes with the Dashboard function.	200234
Final phase completed that aligned the fields in CPARS with the names as they appear in FPDS.	200253
Field will not be limited to 20 characters.	210017
Apply the same data validations for input fields as exist for the send button when the user moves to a new tab, to prevent data issues in evaluations which are saved but not sent.	210031

Description	Reference IDs
Convert ActivityLogDao to use parameterized SQL.	210038
Corrected the Contract Status error when Addendum evaluations exist.	210049
Corrected bug fixes with the Ad Hoc Report tool.	210065
"Part of the FPDS Phase Changes. This changes: 1. NAICS - From: NAICS To: Principal NAICS Code 2. PSC/FSC - From: PSC/FSC To: Product/Service Code 3. Reporting Agency Code – From: Reporting Agency Code To: Reporting Agency ID 4. Reporting Office Code – From: Reporting Agency Code To: Reporting Office ID"	210066
Increased the character length of the Modification Number field to align with FPDS.	210071
Update Character Search Length from 13 Characters to 7-25.	210072
Function Tests exception handling.	210079
Convert MetricsReportDao to use Parameterized SQL.	210080
Added the ability to update the Funding Office ID through the FPDS ATOM feed.	210081
Corrected the Edit an Evaluation bug fix where not all fields were displaying data.	210082
Replace obsolete link in user manual.	210083
Convert ProcessTimesRptDao to use parameterized SQL.	210084
Update functions to use parameterized SQL.	210086
Allow generic queries and updates with Function Tests.	210089
Expand Function Testing capabilities.	210090
Create Function Test sorting capability.	210091
Show JSON errors in Function Tests.	210092
Create a log utility.	210093
Fix AccessDao.getNewFocalPoint SQL.	210094
Having no UEI entered will not create an error.	210097

Description	Reference IDs
Allow JSON parameter "val" to use an unresolved parameter.	210098
Status Tracker Search Results List Bug	210103
Add new functions to Function Test utility.	210105
When a Termination for Cause or Termination for Default is entered in FPDS and it hits against the contract terminations table the Auto Initiate option should be available and have actions for the user to do while also not having the user entered the majority of the information manually. This will mitigate possible errors when they are entered incorrectly manually.	210106
Uniformity amongst all DUNS references. UEI DUNS is now present throughout all environments.	210108
